

JANUARY 2021 UPDATE

As a specialist import wholesaler of respirators we have imported P2 disposables since 2007.

We always strive to provide value, but current market demand and prices makes this challenging.

We have resumed importing our DM10, DM20 and DM30 premium P2 foldable masks.

As forecast our January container shipment was entirely presold.

We are now collating back orders for our next container for late February ETD.

Please confirm asap if you require any inventory from this next shipment as demand remains strong.

We look forward to better times once global demand declines and we have sufficient inventory to fulfill all orders promptly with better prices

Stay safe 😊
