

Hi

With global and local growth for PAPR (powered air purifying respirators) surging we are pleased to confirm the arrival of our new **007 SERIES PAPR ETA 6/8/24**.

Increased workplace protection requirements and expanded fit testing means that bearded workers need alternatives to traditional face fitting respirators.

Like our existing compact respiratory product range, we have x2 headtops covering broad applications, supported with local inventory.

**#GS007 (Grinding Shield)** is the premium version offering integrated head/eye/face protection required by construction workers etc.

**#SH007(Soft Hood)** model is the light weight economical alternative where head / impact protection is not generally required eg spraying etc.

Both styles are available with **P3**, **A1P3** or **ABEK1P3** options for broader applications and feature the latest technology in comfort, safety and performance.

Price for complete kits in durable carry bag starts from < \$1k and varies depending on headtop/ filter selection.

We are collating back orders for these now and aim to dispatch all orders by the 9<sup>th</sup> August 2024.

Further information and order forms may be found on our website.

Kind Regards

*Gerry Moore*
